Dear Parent/Guardian,

As part of the routine UK childhood vaccination schedule and according to our records, your year 11 child is missing one or both of the following scheduled school vaccinations:

- **HPV** (vaccine protecting against the human papillomavirus). This vaccine offers protection against throat, neck, and genital cancers. The vaccine is scheduled and offered to all children in year 8.
- **Meningitis ACWY** and **Diphtheria/ tetanus/ polio** (Td/IPV). The Td/IPV is a booster dose from when they had their pre-school booster at 3 years of age. Both vaccines are scheduled and offered to all children or young people in year 9.

If you would like your child to be up to date with these vaccinations, please use the below link to book an appointment at one of our community clinics.
